Delta Vision Blue Ribbon Task Force,

As expected the the draft strategic plan follows in the same philosophical footsteps as the last Decembers vision report. The Delta Vision staff is following the direction set by the BRTF in that report. In the vision report the BRTF chose to ignore the people, economy, and culture of the Sacramento-San Joaquin Delta (not the California Delta) by only considering water export and habitat restoration as the major themes. "Delta as Place" can not be defined and as ring levees around "legacy towns" and swamps. Page 7 and Action 4.1 captures the essence of your view of the Delta of the future. It is unacceptable to the residents, Communities, agriculture, and other businesses of the Delta. Have to close now to meet the midnight deadline. I'll have more to say.

Mark
